If the driveline of the vehicle has been altered from standard, for example, a vehicle of "mass produced" type which has been modified by fitting non-standard wheels/tyres or an Amateur Built vehicle where it cannot be shown that the driveline components are all from the the same standard production donor vehicle, then a speedometer accuracy test will be needed. This test is available at the Testing Stations marked with an asterisk above.

If your vehicle requires this test you are advised to choose one of the above locations for the test. This would save you the time and trouble of having to re-present the vehicle at a second test location. If you require technical advice contact Swansea 01792 458888.

- Q18/19** Please state your preferred choice. You will be allocated an appointment as near to your choice as possible. Testing outside 'normal' hours may be available at certain test locations.
